

Hello! I'm Suchith

Welcome! I'm an enthusiastic developer and computer science student passionate about machine learning, low-level programming, and open-source software. As a research assistant, I'm committed to pushing the boundaries of technology.

Why Visit Suchicodes?

Professional Insights

Learn about my work, projects, and interests!

[Work Experience](#)[Projects](#)[Resume](#)

Academic Pursuits

My work from University and notes from classes

[Lecture Notes](#)[Research Projects](#)

General Exploration

My notes, projects, and a little about me.

[About Me](#)[Notes](#)[Contact](#)

A Little About Me

I'm a Developer - I enjoy building stuff on the web and otherwise :). I am currently pursuing my undergraduate degree in computer science at the Dalhousie University, Canada.

I'm a Full-Stack programmer who also specializes in GUI and CLI (Command-line interface) based application programming for Windows and Linux. I am passionate about computers and servers and intrigued about operating systems and their workings.

Work Experience

Freelance Developer @ Isla Technologies

August 2022 - October 2022

Worked as a freelance web developer to build a tailored software solution to meet company specific needs. Customized the website UI to enhance investment appeal. Configured a web server to handle requests.

Perform as the system administrator for the company.

Research Assistant @ Dalhousie

May 2024 - Present

Working with Professor Qiang Ye on building training machine learning models to improve intrusion detection systems (IDS).

Associate Software Engineer @ Introhive

September 2021 - April 2022

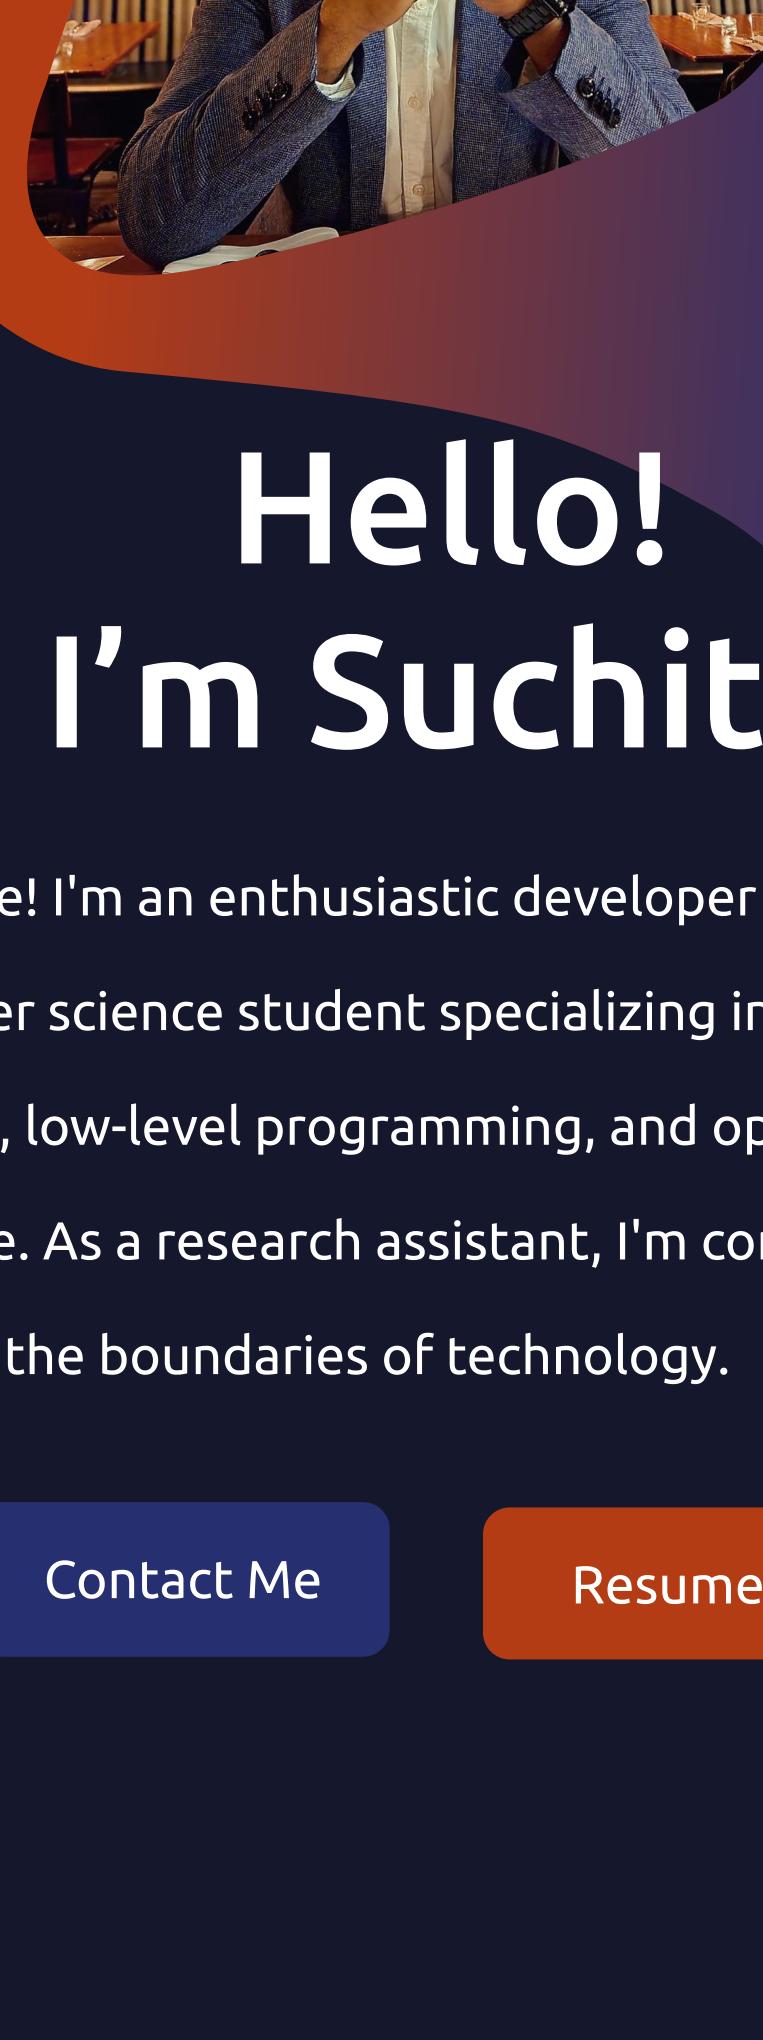

Completed two co-op work terms (internships) at Introhive as an associate software engineer performing the role of a full stack developer. Engineered solutions to existing stories, fixed multiple gating and top priority bugs and performed rigorous testing of the application.

Freelance Developer @ FLAC

March 2022 - July 2022

Worked as a freelance web developer for the Fredericton Legal Advice Clinic (FLAC). Designed and built a web system to handle appointment bookings. Engineered admin pages to allow easy management of appointments.

Perform as the system administrator for the company.
